

# St Clare's High School Taree

Last Friday St Clare's officially opened our refurbished science laboratories funded by the Commonwealth Government's Building Education Revolution.

This ceremony is very much about thanking God for the all of the gifts that people have brought to this project.

Left to Right – Mr Jim Dempsey, Mr Gerard Mowbray, Mrs Penny Wood, Mr Ray Collins, Mr John King, Mrs Christine Tyler & Sr Carmel Moore

Commonwealth funds that have made this refurbishment possible have been vitally important at this stage of St Clare's journey. We are a regional school... and we need to continue to attract students from Forster, Wingham, Gloucester, Bulahdelah and Taree if we are to continue to be the right choice for secondary education in our region. This is the first stage of a number of significant Commonwealth funded upgrades at St Clare's. And for this, we are very grateful.

Sr Carmel Moore was our representative at this occasion in her role with the Catholic Schools Office and was very impressed with the new facilities as well as the gracious hospitality offered by the school.
